

# BUILD YOUR OWN SEED WINNOWER

We all know that our budgies are mess little buggers and waste a lot of seed when eating, Well, there is an answer to this. You can put their feeders in a tray to catch the overspill or maybe your feeders do have a catch tray. This seed can then be recycled.

The advantage of using a winnower is that, you will recycle about 30% of the overspill.

All you need is an old second had vacuum cleaner and a bit of time.
